CONTENTS OF VOLUME 6

Number 1, January 1963

R. H. Symons, M. W. Rees, M. N. Short and R. Markham. Relationships between the Ribonucleic Acid and Protein of Some Plant Viruses . . 1

U. Henning and C. Yanofsky. An Electrophoretic Study of Mutationally Altered A Proteins of the Tryptophan Synthetase of *Escherichia coli* . . 16

S. Kit, L. J. Piekarski and D. R. Dubbs. Introduction of Thymidine Kinase by Vaccinia-Infected Mouse Fibroblasts 22

J. G. Joshi, W. R. Guild and P. Handler. The Presence of Two Species of DNA in some Halobacteria 34

M. Fixman. Rate of Unwinding of DNA 39

J. Hanson and J. Lowy. The Structure of F-Actin and of Actin Filaments Isolated from Muscle 46

J. Eigner, A. H. Stouthamer, I. van der Sluys and J. A. Cohen. A Study of the 70 s Component of Bacteriophage ϕX174 61

M. S. Fox. Biological Effects of the Decay of Incorporated Radioactive Phosphorus in Transforming Deoxyribonucleate 85

Ö. Levin. Electron Microscope Observations on Some 60 s Erythrocruorins and their Split Products 95

Letter to the Editor

H. Kubinski and G. Koch. Instability of an RNA-Fraction from Polio Virus Infected Cells 102

Number 2, February 1963

R. B. Park and N. G. Pon. Chemical Composition and the Substructure of Lamellae Isolated from *Spinacea oleracea* Chloroplasts 105

J. B. Hall and R. L. Sinsheimer. The Structure of the DNA of Bacteriophage ϕX174. IV. Pyrimidine Sequences 115

P. Starlinger. The Formation of Galactokinase in Cells of *Escherichia coli* after Infection with the Transducing λ Bacteriophage 128

Ö. Levin. Electron Micrographs of Bovine Cytochrome *c* 137

D. Kaiser, H. Tabor and C. W. Tabor. Spermine Protect on of Coliphage λ DNA against Breakage by Hydrodynamic Shear 141

A. Gierer. Function of Aggregated Reticulocyte Ribosomes in Protein Synthesis 148

Ö. Levin. Electron Microscopic Investigations of the Subunit of Haemoglobin and the Myoglobin Molecule 158

Letter to the Editor

V. Holoubek. The Composition of Tobacco Mosaic Virus Protein after the Incorporation of 5-Fluorouracil into the Virus 164

Number 3, March 1963

J. Bonner and R-c. C. Huang. Properties of Chromosomal Nucleohistone . 169

W. G. Verly, A. Dewandre, J. Moutschen-Dahmen and M. Moutschen-Damen. Study of Genetic Targets with Labelled Mutagens. The Action of Myleran on the Resistance to Streptomycin of *Chlamydomas eugametos* . 175

I. Finger, C. Heller and J. P. Smith. Immunogenetic Analysis of Proteins of *Paramecium*. III. A Method for Determining Relationships among Antigenic Proteins 182

I. Finger and C. Heller. Immunogenetic Analysis of Proteins of *Paramecium*. IV. Evidence for the Presence of Hybrid Antigens in Heterozygotes . . 190

J. E. Davis and R. L. Sinsheimer. The Replication of Bacteriophage MS2. I. Transfer of Parental Nucleic Acid to Progeny Phage 203

J. Cairns. The Bacterial Chromosome and its Manner of Replication as seen by Autoradiography 208

W. R. Guild. Evidence for Intramolecular Heterogeneity in Pneumococcal DNA 214

A. D. Hershey, E. Goldberg, E. Burgi and L. Ingraham. Local Denaturation of DNA by Shearing Forces and by Heat 230

Letters to the Editor

R. J. Poljak. Heavy-Atom Attachment to Crystalline Lysozyme . . 244

A. M. Haywood and R. L. Sinsheimer. Inhibition of Protein Synthesis in *E. coli* Protoplasts by Actinomycin-D 247

Number 4, April 1963

D. R. Davies and R. L. Baldwin. X-ray Studies of Two Synthetic DNA Copolymers 251

T. Hofmann and P. M. Harrison. The Structure of Apoferritin: Degradation into and Molecular Weight of Subunits 256

J. W. Drake. Properties of Ultraviolet-Induced *r*II Mutants of Bacteriophage T4 268

M. H. Richmond. Random Replacement of Phenylalanine by *p*-Fluorophenylalanine in Alkaline Phosphatase(s) formed during Biosynthesis by *E. coli* 284

G. F. Elliott, J. Lowy and C. R. Worthington. An X-ray and Light-Diffraction Study of the Filament Lattice of Striated Muscle in the Living State and in Rigor 295

J. Monod, J.-P. Changeux and F. Jacob. Allosteric Proteins and Cellular Control Systems 306

F. Rothman and R. Byrne. Fingerprint Analysis of Alkaline Phosphatase of *Escherichia coli* K12 330

N. O. Kjeldgaard and C. G. Kurland. The Distribution of Soluble and Ribosomal RNA as a Function of Growth Rate 341

Number 5, May 1963

S. D. Silver. The Transfer of Material during Mating in *Escherichia coli*. Transfer of DNA and Upper Limits on the Transfer of RNA and Protein 349

J. R. S. Fincham and A. Coddington. Complementation at the *am* Locus of *Neurospora crassa*: a Reaction between Different Mutant Forms of Glutamate Dehydrogenase 361

W. Gilbert. Polypeptide Synthesis in *Escherichia coli*. I. Ribosomes and the Active Complex 374

W. Gilbert. Polypeptide Synthesis in *Escherichia coli*. II. The Polypeptide Chain and S-RNA 389

P. M. Harrison. The Structure of Apoferritin: Molecular Size, Shape and Symmetry from X-ray Data 404

C. Cohen and K. C. Holmes. X-ray Diffraction Evidence for α-helical Coiled-Coils in Native Muscle 423

A. Garen and S. Garen. Genetic Evidence on the Nature of the Repressor for Alkaline Phosphatase in *E. coli* 433

Letter to the Editor

K. C. Holmes and R. Leberman. The Attachment of a Complex Uranyl-fluoride to Tobacco Mosaic Virus 439

A. M. Kapuler and H. Bernstein. A Molecular Model for an Enzyme Based on a Correlation between the Genetic and Complementation Maps of the Locus Specifying the Enzyme 443

G. E. Perlmann. The Optical Rotatory Properties of Pepsinogen . . . 452

H. Yamazaki and P. Kaesberg. Isolation and Characterization of a Protein Subunit of Broad Bean Mottle Virus 465

H. R. Wilson. The Molecular Arrangement in α-keratin 474

P. J. Driskell-Zamenhof and E. A. Adelberg. Studies on the Chemical Nature and Size of Sex Factors of *Escherichia coli* K12 483

R. Benesch and R. E. Benesch. Some Relations between Structure and Function in Hemoglobin 498

Letters to the Editor

R. W. Horne and G. D. Greville. Observations on Ox-Liver L-Glutamate Dehydrogenase with the Electron Microscope . . . 506

W. Fuller, M. Spencer, A. D. Sargentini, F. Sgarlata and R. Langridge. Determination by X-ray Diffraction of the Structure of Deoxyribonucleic Acid from Bacteriophage α . . . 510

Index 513
